

QUALITY POLICY

Quality is a fundamental value characterizing all processes, functions, and people. The company places Quality at the basis of its strategy for the development of innovative products and services, capable of satisfying even the most specific needs of the final consumer and ensures their implementation through:

- the protection of health, safety and well-being of people at work, also within the supply chain;
- environmental protection throughout the product life cycle;
- the anticipation, satisfaction and desire to exceed the different expectations of internal and external Stakeholders, all over the world, benefiting from the high level of competence and professionalism of its people;
- the safety, reliability and high performance of the products and services offered, in compliance with current regulations and the most advanced national and international standards, ensuring the continuous alignment of company processes with the requirements of the Quality standards;
- the identification, prevention, management of the various types of risks, both in company processes and along the entire value chain and the ability to seize development opportunities;
- the continuous evolution and innovation of products, services, processes and systems with a view to excellence and to guarantee a perfect customer experience;
- the promotion towards the internal and external community (Stakeholders) of its corporate culture oriented towards Quality, inclusiveness and ethics, disseminated through a constant and targeted activity of dialogue, communication, motivation and training;
- the timeliness of responses and collaboration with its customers and suppliers, with a view to creating shared value.

The Quality standards are implemented through the monitoring of the quantitative and qualitative objectives set with a view to continuous improvement and through the digitization of company processes, aimed at improving their efficiency and safety.

The Management plays a strategic role in the full implementation of this Policy, making it available to the Stakeholders and ensuring its widest dissemination, making use of the constant supervision of the Quality Department.

The dissemination of the Company Policy, as well as of the objectives, takes place through the distribution of this document and the documentation of the Company Management System. This document is available to the public: the Company undertakes to disseminate it in various forms of communication and distributes it to anyone who requests it.
