Descrizione del prodotto e suo funzionamento

La serie di pulsanti **9025 KNX®** è costituita da **pulsanti capacitivi a 4 – 8 – 10 canali (versione 2 moduli e 3 moduli)**.

Ogni pulsante può essere configurato per la gestione di comandi on/off, dimmer, tapparelle e veneziane, esecuzione ed apprendimento di scenari, sequenze di oggetti o altre funzioni di comando e controllo programmabili.

Il pulsante capacitivo touch include un termostato a 2 stadi con controllore PI integrato per il pilotaggio di apparecchi di riscaldamento e raffrescamento, valvole, fan coil a 2 e 4 tubi. Il dispositivo ha una **sonda di temperatura integrata** ed è dotato sul lato posteriore, di un ingresso configurabile come digitale o analogico; è infatti possibile collegare al connettore posteriore a 2 vie una sonda addizionale NTC (codice eelectron TS01A01ACC / TS01B01ACC / TS01D01ACC– non inclusa) per ottenere una seconda misura della temperatura.

Il dispositivo include una **barra LED RGB** sul lato frontale per la visualizzazione di stati o altre grandezze disponibili sul bus KNX.

Le coperture in vetro sono disponibili in 2 gamme: STANDARD o RGB (solo 2 moduli) ; per ciascuna gamma è disponibile la versione CUSTOM. I vetri in versione CUSTOM hanno possibilità di retro illuminare icone personalizzate e intercambiabili da associare alla funzione configurata .

La serie 9025 KNX® è installabile su scatola 2 o 3 moduli e compatibile con i principali standard (Italiano, Tedesco, Inglese).

Il dispositivo include l’interfaccia di comunicazione KNX.

Programma applicativo ETS									
Scaricabile dal sito: www.eelectron.com Numero massimo indirizzi di gruppo: 250 Corrisponde al numero massimo di indirizzi di gruppo diversi che il dispositivo è in grado di memorizzare. Numero massimo associazioni: 250 Corrisponde al numero massimo di associazioni tra oggetti di comunicazione e indirizzi di gruppo che il dispositivo può memorizzare									
Dati tecnici									
Alimentazione Via bus EIB/KNX 21 ÷ 32 V DC Corrente assorbita EIB/KNX max 20 mA @ 29 V max 24 mA @ 21 V max 12 mA @ 29 V (modo economia)									
Ingresso posteriore – configurazione digitale Per contatti privi di potenziale (contatti puliti) Lunghezza massima cavi ≤ 10 m (cavo intrecciato) Tensione di scansione: 3.3 V DC (generata internamente)

Product and application description

The **KNX® 9025** switch range consists of **4 – 8 – 10 channels (2 and 3 modules version) capacitive buttons**.

Each button can be configured to manage on/off commands, dimming, shutters and venetians control, scene recall and control, objects sequences or other programmable command and control functions.

Device includes a 2 stage Room Temperature Controller with integrated PI to control heating and cooling equipments, valves, 2-pipe and 4-pipe fan coils. Device has an **embedded temperature sensor** and a rear 2 poles connector configurable as digital or analog input; It's possible to connect an additional NTC temperature probe (eelectron codes TS01A01ACC / TS01B01ACC / TS01D01ACC – not included) to perform a direct temperature measurement.

9025 range has a **RGB LED bar** on the front side in order to visualize feedbacks or other values available over the KNX bus.

The glass covers are available in 2 ranges: STANDARD or RGB (only 2 modules); the CUSTOM version is available for each range. Using glasses in CUSTOM version is possible to light up custom and interchangeable icons matching with the associated function. The 9025 KNX® range is mounted in 2 or 3 modules box and is compliant with main standards (British, German, Italian).

Device is equipped with KNX communication interface.

Avvertenze per l'installazione

L'apparecchio deve essere impiegato per installazione fissa in interno, ambienti chiusi e asciutti.

AVVERTENZA

- Non collegare il dispositivo direttamente alla 230 V.
- L'apparecchio deve essere installato e messo in servizio da un installatore abilitato.
- Devono essere osservate le norme in vigore in materia di sicurezza.
- L'apparecchio non deve essere aperto. Eventuali apparecchi difettosi devono essere fatti pervenire alla sede competente.
- La progettazione degli impianti e la messa in servizio delle apparecchiature devono sempre rispettare le norme e le direttive cogenti del paese in cui i prodotti saranno utilizzati.
- Il bus KNX permette di inviare comandi da remoto agli attuatori dell'impianto. Verificare sempre che l'esecuzione di comandi a distanza non crei situazioni pericolose e che l'utente abbia sempre segnalazione di quali comandi possono essere attivati a distanza.

ATTENZIONE

- Le coperture in vetro devono essere maneggiate con cura per evitare che il vetro si danneggi o si rompa.
- Per una corretta misurazione della temperatura, coibentare la scatola da incasso al fine di limitare le correnti d'aria provenienti dai tubi posteriori.
- Se la copertura in vetro viene applicata con il dispositivo acceso bisogna attendere circa 2 minuti per consentire all'apparecchio di adattarsi alla presenza della copertura; nel frattempo è possibile che il pulsante non reagisca alla pressione; attendere 2 minuti.
- Il dispositivo è dotato di 10 interruttori capacitivi con funzione di prossimità. Se la modalità economy è abilitata, il dispositivo entra in modalità eco (tutti i LED spenti) dopo un tempo configurabile; può essere risvegliato se rileva una presenza entro pochi centimetri.

Sonde di temperatura

TS01A01ACC

ATTENZIONE: Mantenere 6 mm di distanza da cavi in tensione!

Tolleranza della resistenza NTC	± 3%
Intervallo di misura	-20 °C + +100 °C
Cavo	2 fili singolo isolamento
Colore dei cavi	Nero
Colore NTC	Nero

TS01B01ACC

ATTENZIONE: Mantenere 3 mm di distanza da cavi in tensione!

Tolleranza della resistenza NTC	± 2%
Intervallo di misura	-50 °C + +60 °C
Cavo	2 fili doppio isolamento
Colore dei cavi	Bianco
Colore NTC	Bianco

TS01C01ACC

ATTENZIONE: Mantenere 3 mm di distanza da cavi in tensione!

Tolleranza della resistenza NTC	± 1%
Intervallo di misura	-40 °C + +105 °C
Cavo	2 fili doppio isolamento
Colore dei cavi	Nero
Colore NTC	Metallo

TS01D01ACC

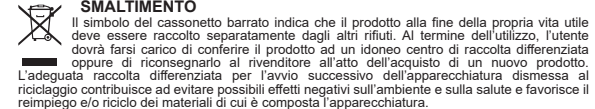

ATTENZIONE: Mantenere 6 mm di distanza da cavi in tensione!

Tolleranza della resistenza NTC	± 2%
Intervallo di misura	-5 °C + +45 °C
Cavo	2 fili doppio isolamento
Colore dei cavi	Bianco
Colore NTC	Bianco / Nero

Sensore Temperatura

Intervallo misura:	-5 °C + +55 °C
Risoluzione:	0.01 °C
Tolleranza typ. (max.):	± 0.5 °C

Installation instructions

he device may be used for permanent indoor installations in dry locations within wall box mounts.

WARNING

- The device must not be connected to 230V cables.
- The prevailing safety rules must be heeded.
- The device must be mounted and commissioned by an authorized installer. The applicable safety and accident prevention regulations must be observed.
- The device must not be opened. Any faulty devices should be returned to manufacturer.
- For planning and construction of electric installations, the relevant guidelines, regulations and standards of the respective country are to be considered.
- KNX bus allows you to remotely send commands to the system actuators. Always make sure that the execution of remote commands do not lead to hazardous situations, and that the user always has a warning about which commands can be activated remotely.

CAUTION

- Glass covers should be handled with care to prevent the glass from being damaged or broken.
- For a correct temperature measurement, insulate the flush-mounting box in order to limit the air flows coming from the rear pipes.
- If the glass cover is applied with the device switched on, then you have to wait about 2 minutes to let the device adapt to the presence of the cover; in the meantime it's possible that the button doesn't react to the finger press; wait 2 minutes.
- Device has 10 capacitive switches with proximity function. If economy mode is enable device goes in eco mode (all the LEDs switched off) after a configurable time; it can be awakened if it detects the presence within a few centimetres.

Temperature Probes

TS01A01ACC

WARNING: keep at least 6 mm from all live parts!

NTC resistance tolerance	± 3%
Measure range	-20 °C + +100 °C
Cable	2 wire single insulation
Cable colour	Black
NTC colour	Black

TS01B01ACC

WARNING: keep at least 3 mm from all live parts!

NTC resistance tolerance	± 2%
Measure range	-50 °C + +60 °C
Cable	2 wire double insulation
Cable colour	White
NTC colour	White

TS01C01ACC

WARNING: keep at least 3 mm from all live parts!

NTC resistance tolerance	± 1%
Measure range	-40 °C + +105 °C
Cable	2 wire double insulation
Cable colour	Black
NTC colour	Metal

TS01D01ACC

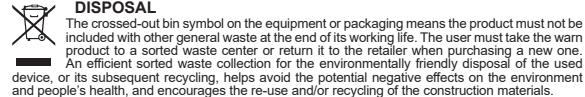

WARNING: keep at least 6 mm from all live parts!

NTC resistance tolerance	± 2%
Measure range	-5 °C + +45 °C
Cable	2 wire double insulation
Cable colour	White
NTC colour	White / Black

Temperature Sensor

Range:	-5 °C + +55 °C
Resolution:	0.01 °C
Tolerance typ. (max.):	± 0.5 °C

Installationshinweise

Das Gerät muss für die Inneninstallation in geschlossenen und trockenen Umgebungen verwendet werden.

WARNUNG

- Das Gerät darf nicht direkt an 230V Leitungen angeschlossen werden.
- Das Gerät muss von einem autorisierten Installateur installiert und in Betrieb genommen werden
- Die geltenden Sicherheits- und Unfallverhütungsvorschriften sind zu beachten
- Das Gerät darf nicht geöffnet werden. Defekte Geräte müssen an die zuständige Zentrale geschickt werden.
- Anlagenplanung und Inbetriebnahme der Anlage müssen immer den Normen und Richtlinien des Landes entsprechen, in dem die Produkte verwendet werden.
- Über den KNX-Bus können Fernsteuerbefehle an die Anlagenaktoren gesendet werden. Überprüfen Sie immer, dass ferngesteuerte Befehle keine gefährlichen Situationen verursachen und dass der Benutzer immer anzeigen kann, welche Befehle aus der Ferne aktiviert werden können.

ACHTUNG

- Glasabdeckungen sollten vorsichtig gehandhabt werden, um zu verhindern, dass das Glas beschädigt wird oder bricht.
- Isolieren Sie für eine korrekte Temperaturmessung den Einbaukasten, um den Luftstrom aus den hinteren Rohren zu begrenzen.
- Wenn die Glasabdeckung bei eingeschaltetem Gerät angebracht ist, müssen Sie etw. 2 Minuten warten, damit sich das Gerät an die Anwesenheit der Abdeckung anpassen kann. In der Zwischenzeit ist es möglich, dass der Knopf nicht auf die Fingerpresse reagiert; warte 2 Minuten.
- Das Gerät verfügt mit 10 kapazitive Taste mit Proximity-Funktion. Wenn der Economy-Modus aktiviert ist, wechselt das Gerät nach einer konfigurierbaren Zeit in den Eco-Modus (alle LEDs sind ausgeschaltet). Es kann geweckt werden, wenn es die Präsenz innerhalb einiger Zentimeter erkennt.

Temperatursonden

TS01A01ACC

WARNING: keep at least 6 mm from all live parts!

NTC Widerstandstoleranz	± 3%
Messbereich	-20 °C + +100 °C
Kabel	einzelne Isolations Drähte
Kabelfarbe	Schwarz
NTC-Farbe	Schwarz

TS01B01ACC

WARNUNG: Halten Sie 3 mm von stromführenden Kabeln fern!

NTC Widerstandstoleranz	± 2%
Messbereich	-50 °C + +60 °C
Kabel	2 Drähte mit doppelter Isolierung
Kabelfarbe	Weiß
NTC-Farbe	Weiß

TS01C01ACC

WARNUNG: Halten Sie 3 mm von stromführenden Kabeln fern!

NTC Widerstandstoleranz	± 1%
Messbereich	-40 °C + +105 °C
Kabel	2 Drähte mit doppelter Isolierung
Kabelfarbe	Schwarz
NTC-Farbe	Metall

TS01D01ACC

WARNUNG: Halten Sie 6 mm von stromführenden Kabeln fern!

NTC Widerstandstoleranz	± 2%
Messbereich	-5 °C + +45 °C
Kabel	2 Drähte mit doppelter Isolierung
Kabelfarbe	Weiß
NTC-Farbe	Weiß / Schwarz

Temperatursensor

Messbereich:	-5 °C + +55 °C
Auflösung:	0.01 °C
Typ. Toleranz (max.):	±0.5 °C

Advertencias para la instalación

El aparato se debe usar para instalación fija en interior, ambientes cerrados y secos.

ADVERTENCIA

- El dispositivo no debe conectarse directamente a cables de 230V.
- El aparato se debe instalar y poner en servicio por un instalador habilitado.
- Se deben cumplir con las normas en vigor en materia de seguridad y prevención de accidentes.
- El aparato no se debe abrir. Eventuales aparatos defectuosos se deben entregar en la sede competente.
- La proyección de las instalaciones y la puesta en servicio de los aparatos deben cumplir con las normas y con las directivas vigentes del país en el cual el producto se utilizará.
- El bus KNX permite enviar mandos de remoto a los actuadores de la instalación. Siempre controlar que la ejecución de mandos a distancia no genere situaciones peligrosas y que el usuario tenga siempre señalados los mandos que se pueden activar a distancia.

ATENCIÓN

- Las cubiertas de cristal deben manejarse con cuidado para evitar que el cristal se dañe o se rompa
- Para una correcta medición de la temperatura, aisle la caja de empotrar para limitar los flujos de aire provenientes de las tuberías traseras.
- Si el protector de cristal se coloca con el dispositivo encendido, deberá esperar unos 2 minutos para que el dispositivo se adapte a la presencia del mismo; mientras tanto, es posible que el botón no reaccione al presionar con el dedo; espere 2 minutos.
- El dispositivo tiene 10 interruptores capacitivos con función de proximidad. Si el modo económico está habilitado, el dispositivo entra en modo ecológico (todos los LED se apagan) después de un tiempo configurable; puede despertarse si detecta la presencia dentro de unos pocos centímetros.

Sondas de temperatura

TS01A01ACC

PRECAUCIÓN: ¡Manténgalo a 6 mm de los cables activos!

Tolerancia de la resistencia NTC	± 3%
Rango de medida	-20 °C + +100 °C
Cable	2 cables con aislamiento simple
Colores de los cables	Negro
Color NTC	Negro

TS01B01ACC

PRECAUCIÓN: ¡Manténgalo a 3 mm de los cables activos!

Tolerancia de la resistencia NTC	± 2%
Rango de medida	-50 °C + +60 °C
Cable	2 cables con doble aislamiento
Colores de los cables	Bianco
Color NTC	Bianco

TS01C01ACC

PRECAUCIÓN: ¡Manténgalo a 3 mm de los cables activos!

Tolerancia de la resistencia NTC	± 1%
Rango de medida	-40 °C + +105 °C
Cable	2 cables con doble aislamiento
Colores de los cables	Negro
Color NTC	Metálico

TS01D01ACC

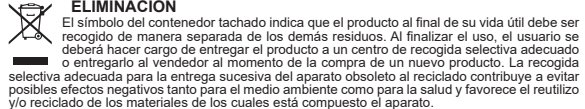

PRECAUCIÓN: ¡Manténgalo a 6 mm de los cables activos!

Tolerancia de la resistencia NTC	± 2%
Rango de medida	-5 °C + +45 °C
Cable	2 cables con doble aislamiento
Colores de los cables	Bianco
Color NTC	Bianco / Negro

Sensor de temperatura

Intervalo de medición:	-5 °C + +55 °C
Resolución:	0.01 °C
Tipo de tolerancia (max):	±0.5 °C
